DETAILED ACTION

Claims 1-18 are pending in the application.

Priority

1. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification of in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

It is presumed that the Application No. 10/075,915 is a continuation of 08/727,123 pending clarification by the applicants.

Information Disclosure Statement

2. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

3. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

- a) Claims 1-18 are vague and indefinite in that it is not known what is meant by the N atom of the 5-membered ring which is not valence satisfied.
- b) Claims 1, 2, 6, 7, 11-13 and 15-18 are vague and indefinite in that it is not known what is meant by a **C₁-C₁₂ group** or a **C₁-C₁₂ group** substituted by lower alkyl or lower alkoxy groups in the definition of X.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by BARTLETT et al., Journal of the American Chemical Society. BARTLETT teaches the compounds of the instant invention where R is H and N atom of the 5-membered ring is substituted with a H or a methyl group. See column 1 of page 131, i.e. noribogaine and alloibogaine.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

5. Claims 3-5, 8-10 and 14 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 3-5, 8-10 and 14 of prior U.S. Patent No. 6,348,456. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 2, 6, 7, 11-13 and 15-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 6, 7, 11-13 and 15-18 of U.S. Patent No. 6,348,456. Although the conflicting claims are

Art Unit: 1624

not identical, they are not patentably distinct from each other because the compounds, compositions and method of use of the compounds of the instant invention is embraced by the compounds, compositions and method of use of the compounds of U.S. '456 where R is hydrogen or a group of the formula $-C(=O)-X$ wherein X is an unsubstituted C_1-C_{12} group or a C_1-C_{12} group which is substituted by lower alkyl or lower alkoxy groups.

7. Claims 6-10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U.S. Patent No. 5,591,738 in view of the court decision granting patent rights to the inventors of the instant invention (United States District Court Southern District of Florida Miami Division - Case No. 96-3712-CIV-HIGHSMITH/BROWN). Although the conflicting claims are not identical, they are not patentably distinct from each other because the compositions of the compounds of the instant invention is embraced by the complex compositions of U.S. '738 where R is hydrogen or a group of the formula $-C(=O)-X$ wherein X is an unsubstituted C_1-C_{12} group or a C_1-C_{12} group which is substituted by lower alkyl or lower alkoxy groups.
